Wisconsin's healthy counties

Posted: Nov 20, 2008 11:14 AM CST

Madison (WKOW) -- Dane County is among the healthiest counties in the state, according to a new study by the UW Madison.

But that same study calls attention to the fact there are health discrepancies in Wisconsin.

For instance, the report shows Ozaukee and Waukesha counties are among the healthiest places in Wisconsin to live, but neighboring Milwaukee is one of the unhealthiest in the state.

A healthy county is one where people live to be 75 or older, their health is generally good, and their quality of life is high.
