

## **Peter W. Garner, MPH**

Vice President, Health System Analytics  
BSG Analytics

Peter Garner is the Vice President, Health System Analytics for BSG Analytics™, LLC (“BSGA”). BSGA is an employee benefits data and health care consulting firm founded in 2012 by The Benefit Services Group (“BSG”), which was founded in 1987. BSGA serves nationwide employers in a wide variety of industries and consults for health care systems in Wisconsin and other markets. Most recently BSGA has been engaged by medical device and pharmaceutical companies using BSGA unique data analysis services. BSGA has also been at the epicenter of the creation of new multi health system accountable care organizations in Wisconsin, where Mr. Garner leads the data analytics for the Clinical Quality Team.

Mr. Garner has served for over 30 years in various roles in the health care, insurance, consulting and employee benefits industries. He has extensive experience in analyzing employee benefits and health care data to develop performance improvement plans for clients. Mr. Garner also spent many years building managed care provider networks and HMO and PPO insurance products. His understanding of employers, health care providers and insurance operations makes him a unique resource for health care systems that are ready to change and become accountable for the care they deliver. His work is focused on assisting health care systems with developing new methods for measuring clinical effectiveness and efficiencies. BSGA’s work also involves creating new contracting strategies with payers such as global reimbursement rates, and working on accountable care operations.

Mr. Garner also leads special health care research projects with HCTrends, a sister company in Wisconsin. Together they focus on analyzing health care trends and publishing white papers about such diverse topics as health system efficiency and quality, Medicaid and Marketplace Exchange Enrollment results.

Mr. Garner earned his bachelor’s degree (BA) in psychology at Johns Hopkins University and a master of public health (MPH) at Yale University. He currently is an adjunct professor at the College of Business at Cardinal Stritch University specializing in organizational strategy, change management and leadership.
