Selection of Recent Studies

- *Opioid-Related Risk Screening in Wisconsin Pharmacies.* Research suggests that pharmacists can have a role in risk-screening and overdose prevention, but may be limited by feasibility issues and educational barriers.
www.fammed.wisc.edu/study-explores-pharmacists-role-addressing-opioid-epidemic/
- *Adherence to Chronic Opioid Therapy Prescribing Guidelines in a Primary Care Clinic.* Researchers found that white patients were more likely to be on a pain agreement when compared to patients of other races at a primary care clinic.

Evidence-Based Health Policy Project

Research | Analysis | Education | Dialogue

www.evidencebasedhealthpolicy.org

- *Neonatal Abstinence Syndrome (NAS) and Maternal Substance Use in Wisconsin, 2009-2014*. Study findings show an increase in maternal opioid use and NAS rates in Wisconsin over time, with disproportionate effects on non-Hispanic, white, Medicaid-insured women.
www.wisconsinmedicalsociety.org/WMS/publications/wmj/pdf/115/6/287.pdf
- *Mindfulness Meditation-Based Intervention is Feasible, Acceptable, and Safe for Chronic Low Back Pain Requiring Long-Term Daily Opioid Therapy*. Additional research from Dr. Aleksandra Zgierska regarding one of today's topics on mind-body interventions for chronic pain.
<http://online.liebertpub.com/doi/abs/10.1089/acm.2015.0314>
- *Promoting Opioid Agonist Therapy in the US Drug Courts*. Research on the role of drug courts and medication-assisted treatment in reducing illicit drug use.
internalmedicinereview.org/index.php/imr/article/view/98

UW-Madison Pain and Policy Studies Group. This program at the Carbone Cancer Center at the UW School of Medicine and Public Health conducts research related to balanced access to opioids.
