

# **Affordable Care Act & Medicaid Reform in Wisconsin Enrollment and Coverage Trends Chartpack**

July 2015

University of Wisconsin  
Population Health Institute  
SCHOOL OF MEDICINE AND PUBLIC HEALTH

# Purpose and Limitations

- This chartpack is intended to allow Wisconsin residents to track the progress and impact of both the federal health reform law and Wisconsin's entitlement reforms. The chartpack culls through different reports from the federal and state governments to provide an accessible format that a general reader can digest.
- It provides early estimates, while awaiting more concrete data and the outcomes of more rigorous research.
- The data and estimates only show trends based on enrollment in Affordable Care Act Marketplace plans and Medicaid/BadgerCare. It does not track changes in coverage in off-exchange private coverage.
- Changes in private coverage have occurred in this time period, which would have also affected (and likely decreased) the overall rate of uninsured. For example, the economy became stronger, increasing employment and likely insurance coverage; more young adults under age 26 gained coverage options through their parents' health insurance policies; people with pre-existing conditions gained coverage options through the private market. The estimates of and conclusions related to changes in overall insurance coverage in this chartpack do not account for these other factors.
- The estimates here rely on assumptions based on the national literature regarding the proportion of people enrolling in new coverage that come from prior uninsured status. Wisconsin's insurance market varies from the overall national market, and its Medicaid program varies from many states, in some ways that would affect how the national estimates apply to the state. For this reason, this chartpack offers a range with upper- and lower-bound estimates.

# The Impact of Wisconsin's Medicaid Reforms and the ACA: What We Know

- Depending on the chosen assumptions, 62%-81% of the uninsured from 2013 remain uninsured as of June 2015.
- Depending on chosen assumptions, Wisconsin's uninsured rate has declined by 19-38%. Recent estimates report a 35% decline in the national rate of uninsured.
- The state has not yet met the Governor's goal of reducing the uninsured by 224,580 adults by 2015.

## Geographic Variation

- Coverage gains and reductions in uninsured vary substantially across counties.
- Some counties saw ACA coverage gains offset by BadgerCare coverage losses, such that their overall uninsured levels remain unchanged or increased. This occurred uniquely in rural counties, with nearly flat or declining overall coverage noted particularly in Juneau, Lincoln, Forest, Sawyer, and Dodge Counties.

## Medicaid/BadgerCare Trends

- BadgerCare's overall Parents and Caretaker enrollment has declined 27%. Enrollment of Childless Adults has increased more than eight-fold (836%).
- BadgerCare enrollment for children over 100% FPL—who remain eligible for coverage but whose parents and caretakers have lost that eligibility — has declined 5.5% since September 2013, with a total of 6,727 children in the 150-200% FPL leaving BadgerCare.
- The status of the parents and caretaker adults >100% FPL that lost BadgerCare coverage as of April 2014 – whether they gained ACA coverage, other private insurance, or became uninsured – remains unknown.

## ACA Summary Data

- 183,155 Wisconsin residents effectuated coverage in a Qualified Health Plan through the ACA Marketplace, 90.7% of them with a federal financial subsidy.
- 88.3% of WI residents who selected an ACA plan effectuated their coverage, meaning they paid their first month's premium, compared to an 85% effectuation rate nationally.
- Wisconsin's average federal premium subsidy is \$317/month, which results in a 72% reduction in the premium paid by individuals.
- 82% of Wisconsin residents who enrolled in ACA plans in 2014 re-enrolled in coverage in 2015.
- Wisconsin's ACA enrollment skews older: 26% of Wisconsin ACA enrollments are in the 18-34 age range; nationally 28% are in this age range. 32% of Wisconsin enrollees are ages 55-64, compared to 25% among all Healthcare.gov states.

# Governor's Health Insurance Coverage Goal

“Through Governor Walker’s Entitlement Reform Plan, all Wisconsinites have access to affordable health care coverage. People living in poverty have coverage through Medicaid while individuals and families above the poverty level have access to affordable private health care coverage through the federal Health Insurance Marketplace. Approved as part of the 2013-15 state budget, this plan is projected to reduce the number of uninsured in our state by 224,580, or roughly half, while strengthening the state’s safety net for Wisconsin’s neediest residents.”

Last Revised: December 29, 2014

# Federally Facilitated Marketplace ACA

## Enrollment in Wisconsin as of March 31, 2015

- 237,426 individuals determined eligible for Marketplace, 205,697 of whom were determined eligible to enroll in a Marketplace Plan with financial assistance.
- 207,349 of potentially eligible people selected a Qualified Health Plan through the ACA Marketplace.
- 183,155 of those who selected a qualified health plan effectuated\* their coverage.

Effectuated* Enrollment as of March 31, 2015		
	Wisconsin	National
Effectuated* coverage out of those who selected ACA health plans	88.3%	85%
Percent with Financial Subsidy	90.7%	85%
Percent without Financial Subsidy	9.3%	15%

➤ **Wisconsin does a relatively well in collecting premiums from new insureds.**

Average % Reduction in Premium after APTC	72%	72%

# WI Effectuated Enrollment by Plan Metal Level

Metal Level	Enrollment*	Percent
Catastrophic	1,252	0.7%
Bronze	40,544	22.1%
Silver	130,203	71.1%
Gold	8,262	4.5%
Platinum	2,894	1.6%
Total	183,155	100%

\*As of March 31, 2015

**Bronze:** Covers 60% of the cost of essential health benefits across the enrolled population.

**Silver:** Covers 70% of the cost of essential health benefits across the enrolled population.

Eligible plan for cost-sharing assistance.

**Gold:** Covers 80% of the cost of essential health benefits across the enrolled population.

**Platinum:** Cover 90% of essential health benefits across the enrolled population.

**Catastrophic:** Only available to those under 30 years of age, or eligible for a “hardship exemption” to the individual mandate. Covers limited benefits with high cost-sharing.

# Premium Rates Available for Individuals who have 2015 Marketplace Plan Selections with Advanced Premium Tax Credit (APTC- federal premium subsidy)

- Low premium plans (<100%/month) are available to the predominance of persons eligible for APTCs.
- Wisconsin enrollees choose plans based on factors beyond simply the lowest premium.

# ACA Plan Premiums, 2014-15: Single Coverage, 40-year-old non-smoker

<b>Total</b>	<b>207,343</b>

# Enrollment of People Below the Poverty Level into Medicaid/BadgerCare

Pre- and Post-ACA  
(September 2013-June 2015)

- ✓ Enrollment has increased 3.5% for parents and caretaker adults below 100% FPL.
- ✓ Enrollment of children below the poverty line has increased 2.9%.
- ✓ Combined enrollment of parents/caretakers and children with incomes below the poverty line increased 3.1% — perhaps bringing in people previously eligible but not enrolled, or it may simply reflect the ACA’s change to “modified adjusted gross income” (MAGI), thus slightly changing who falls under the 100% threshold.

Note: This does not include enrollment declines from the TMA/Extensions program

# Children's Pre- and Post-ACA Medicaid/BadgerCare Enrollment

Note: This does not include changes in coverage extensions under "Transitional Medical Assistance" (TMA)

Change from September 2013 through June 2015

- Enrollment for children over 100% FPL—who remain eligible for coverage but whose parents and caretakers have lost eligibility for BadgerCare coverage— has declined 5.5% since September 2013, with a drop-off of 7,256 children in this eligible group, including a decline of 2.4% in the 100-200% FPL range.
- Children above 300% FPL are no longer eligible for BadgerCare after April 1, 2014, which may account for much of the substantial drop off noted in the >250% FPL category.
- Enrollment of children below the poverty level has increased by 8,532 children.

# Wisconsin Medicaid Enrollment

Parents and caretaker  
BadgerCare  
enrollment has  
**declined 27%.**

Enrollment of Childless  
Adults has **increased  
more than eight-fold  
(836%).**

- Wisconsin’s Medicaid enrollment has increased 7.54% since pre-ACA period, compared to 8.83% increase in other states that did not participate in the ACA Medicaid expansion and a 28.15% increase in Medicaid expansion states.
- Some of this difference in growth reflects Wisconsin’s higher eligibility levels relative to other states prior to the ACA, while some of the difference reflects the current Wisconsin Medicaid reforms.

# Wisconsin Entitlement Reform: Movement of Adults from BadgerCare to Other Coverage Pre- and Post-ACA

In 2014, Wisconsin DHS had tracked the enrollment status as of June 30, 2014 of 62,776 adults who became ineligible for BadgerCare under Governor Walker's entitlement reform rules that took effect April 1, 2014.

**Note: Wisconsin has not tracked this group since June 2014, so it is not known how many have connected to some coverage by 2015. DHS is currently working with the federal CMS to update this information.**

Tracked Adults N=62,776

As of June 30, 2014

- 18,801 (30%) had selected an ACA Qualified Health Plan via the Marketplace
  - 4,867 (8%) were redetermined eligible for BadgerCare
- Insurance status of 62% of those removed from BadgerCare (38,116 people) had remained unknown

# Extensions/Transitional Medicaid Enrollment

- Enrollment has declined 22% 2013-14 state policy changes for Medicaid coverage extensions, known as the Transitional Medicaid. This program provides temporary continuing coverage for those who have an increase in income while on Medicaid, such that seeking employment, regardless of benefits, would not jeopardize health insurance coverage.

# Projecting the Change in Insured/Uninsured Estimates under Various Assumptions

Estimates vary widely among surveys about the share of ACA enrollees who came from previously uninsured status. Results depend on the period in which the survey was fielded and on the population surveyed.

- Kaiser Family Foundation, June, 2014: 57%  
<http://kff.org/private-insurance/report/survey-of-non-group-health-insurance-enrollees/>
- Commonwealth Fund, July 2014: 63%  
<http://www.commonwealthfund.org/publications/press-releases/2014/jul/after-first-aca-enrollment-period>
- RAND, June, 2015: 37% [http://www.rand.org/pubs/external\\_publications/EP50692.html](http://www.rand.org/pubs/external_publications/EP50692.html)  
Also, with regard to new Medicaid enrollees: Of the estimated 12.6 million new enrollees in Medicaid, 6.5 million (52 percent) were uninsured in September 2013
- McKinsey, March 2015: 36%.  
[http://healthcare.mckinsey.com/sites/default/files/McKinsey%20Reform%20Center\\_2015%20OEP%20Consumer%20Survey%20Insights.pdf](http://healthcare.mckinsey.com/sites/default/files/McKinsey%20Reform%20Center_2015%20OEP%20Consumer%20Survey%20Insights.pdf)
- HHS, November 2014: 75-80%  
[http://aspe.hhs.gov/health/reports/2014/Targets/ib\\_Targets.pdf](http://aspe.hhs.gov/health/reports/2014/Targets/ib_Targets.pdf)

➤ **The projected rates of uninsured change under these alternative scenarios.**

U.S. Census SAHIE 2013 Baseline Uninsured Estimate for Wisconsin	505,168
OE2 Effectuated Coverage	183,155
Net change BadgerCare Sept 2013-June 2015	53,791

## Estimates of Remaining Uninsured, Using different assumptions

Between September 2013 to June 2015, Wisconsin's BadgerCare enrollment increased by 53,791.

Number of persons remaining uninsured, with various assumptions

		% ACA enrollees coming from prior uninsured		
		36%	57%	75%
% Medicaid increase coming from Uninsured	100%	385,441	346,979	314,011
	52%	411,261	372,798	339,830

Reductions in uninsured will vary depending on what proportion of ACA and Medicaid/BadgerCare enrollees came from uninsured relative to how many came from other coverage. Estimates here based Rand/McKinsey (36%), Kaiser (57%), and upper bound (75%) of ACA enrollees from uninsured, and that, of the Medicaid increase either 100% or 52% (Rand) came from the uninsured.

Percent of persons remaining uninsured, with various assumptions

		% ACA enrollees coming from prior uninsured		
		36%	57%	75%
% Medicaid increase coming from Uninsured	100%	76%	69%	62%
	52%	81%	74%	67%

Depending the chosen assumption, Wisconsin's uninsured rate has declined by 19-38%, with 62%-81% of the uninsured from 2013 remaining uninsured as of June 2015.

# Reduction in Uninsured

Number reduction of uninsured persons, with various assumptions

		% ACA enrollees coming from prior uninsured		
		36%	57%	75%
% Medicaid increase coming from Uninsured	100%	119,727	158,189	191,157
	52%	93,907	132,370	165,338

Based on these assumptions and available data, the state has not met the Governor's goal of reducing the uninsured by 224,580 persons by 2015.

## Estimated Wisconsin change in rate of uninsured, as of June 2015

19-38% decline, *depending on assumptions*

## Nationally Reported Change in the Uninsured Rate

35% reduction, adults, as of 3/4/15

ASPE analysis of Gallup-Healthways Well-Being Index survey

[http://aspe.hhs.gov/health/reports/2015/uninsured\\_change/ib\\_uninsured\\_change.pdf](http://aspe.hhs.gov/health/reports/2015/uninsured_change/ib_uninsured_change.pdf)

20% reduction from 2013-2014

National Health Interview Survey, 2014

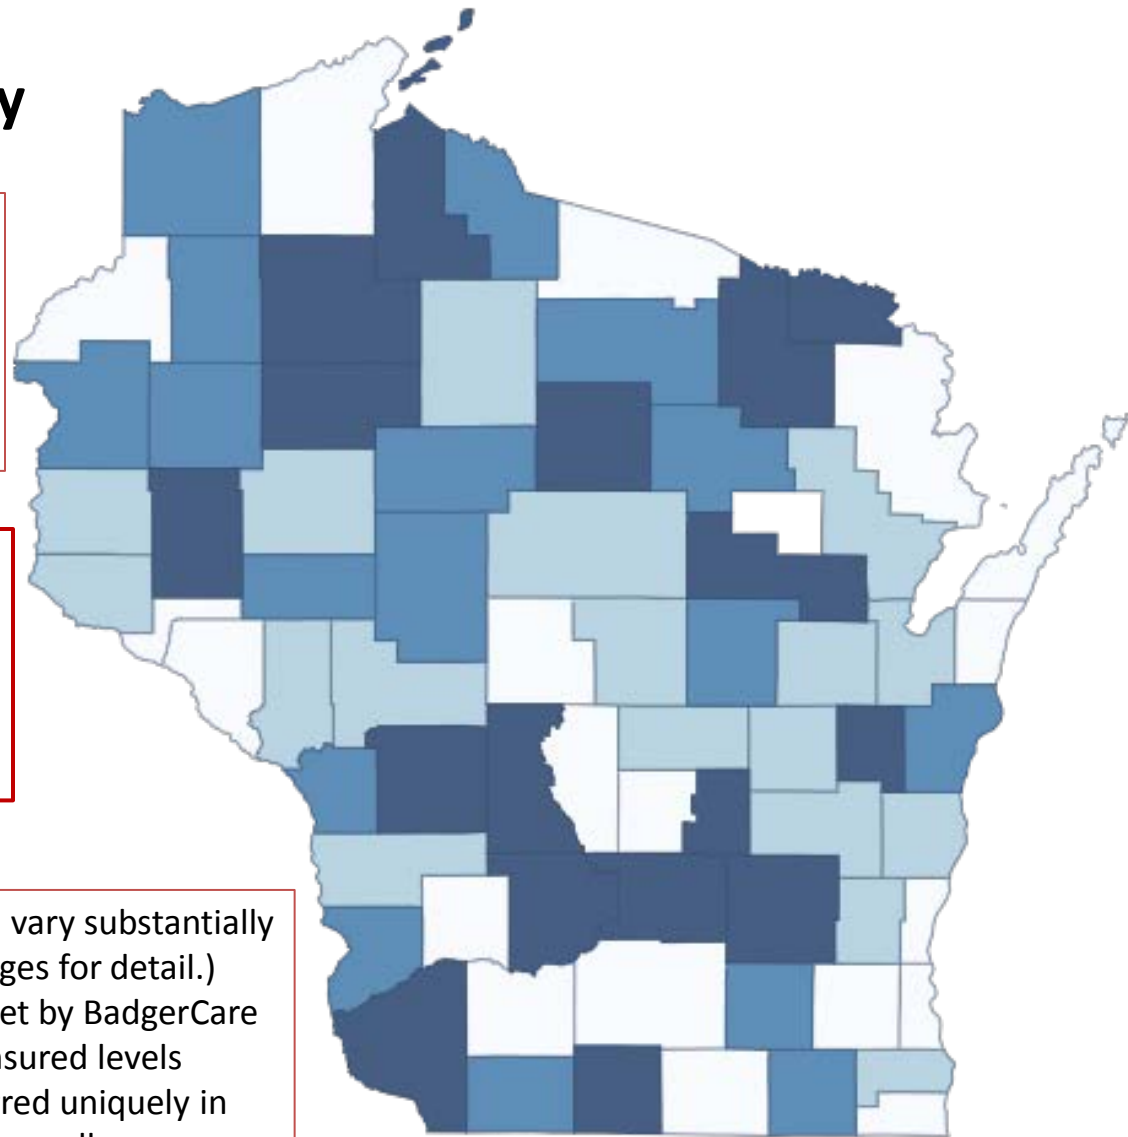

<http://www.cdc.gov/nchs/data/nhis/earlyrelease/insur201506.pdf>

# Changes Vary by Geography

Example Assumptions:  
57% of New ACA Enrollments come from prior uninsured  
100% of Medicaid increase comes from prior uninsured

Example Results:  
Estimated Percent Decrease in Uninsured 2013-2015  
Darker color = lesser decrease

- Coverage gains and reductions in uninsured vary substantially across counties. (See tables on following pages for detail.)
- Some counties saw ACA coverage gains offset by BadgerCare coverage losses, such that their overall uninsured levels remain unchanged or increased. This occurred uniquely in rural counties, with nearly flat or declining overall coverage noted.

	SAHIE 2013 Total Uninsured	OE2 Effectuated coverage (.883 discount off total enrollment)	Remain uninsured, if 57% from uninsured	State: Net change Medicaid Sept 2013- June 2015	Remain uninsured, if 57% ACA from uninsured, 100% Medicaid from Uninsured	Remain uninsured if 57% ACA from uninsured, 52% Medicaid from Uninsured	% Remain uninsured, if 57% ACA from uninsured, 100% Medicaid from Uninsured	% Remain Uninsured, if 57% ACA from uninsured, 52% Medicaid from Uninsured	% decrease in uninsured, if 57% from uninsured, 100% Medicaid from Uninsured	% decrease in uninsured, if 57% ACA from uninsured, 52% Medicaid from Uninsured
