

HOW HEALTHY IS WISCONSIN?

We're living longer

Across all ages, fewer people are dying

Age-Adjusted Death Rate per 100,000

But not feeling better

The percentage of people reporting living in poor health is increasing

Adults with Fair or Poor Health (%)

And while we're improving on some key health factors... such as smoking less

Adult Smoking (%)

We're doing worse on other key factors that affect our health... such as increasing poverty

Children in Poverty (%)

And, there are big gaps in health across our state—some residents have greater opportunities for a healthier life than others.
